

PERSIVAPP

Turn your scattered processes into **governed, controlled, and scalable** operations.

**Your business doesn't need more disconnected apps.
You need systems that run operations.**

Replace Excel-driven chaos with structured workflows your business depends on — without writing a single line of code.

Get Started in Minutes

Why Operations Break at Scale...

Spreadsheets Don't Enforce Processes

No guardrails for tasks or approvals.

Teams Depend On Follow-Ups

Execution relies on chasing and reminders.

Data is Messy & Inconsistently Updated

Many versions, nothing can be trusted.

No Real-Time Visibility

Issues are hidden until it's too late.

Most businesses don't scale because their processes don't.

MES

Maintenance

Production Data
Capturing

Stock Keeping

In Process
Quality Checks

Did you ever wish for **A way to generate
custom applications on the fly for
different business Operations
instantly?**

Payment Approval
Systems

Store

HR

Logistics

Quality Checks

EHS

Order
Acceptance

Now you can...

**Define in excel and see your
application come to life instantly**

No need to code

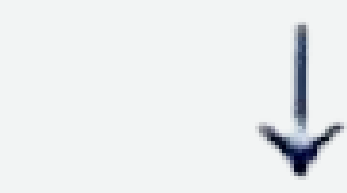

No Tech knowledge required

From **Excel Sheets** to Running **Business Systems** Instantly!

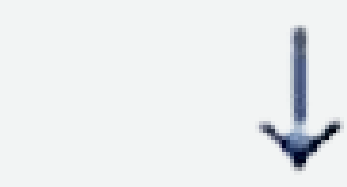

Import Excel

from SharePoint or local files

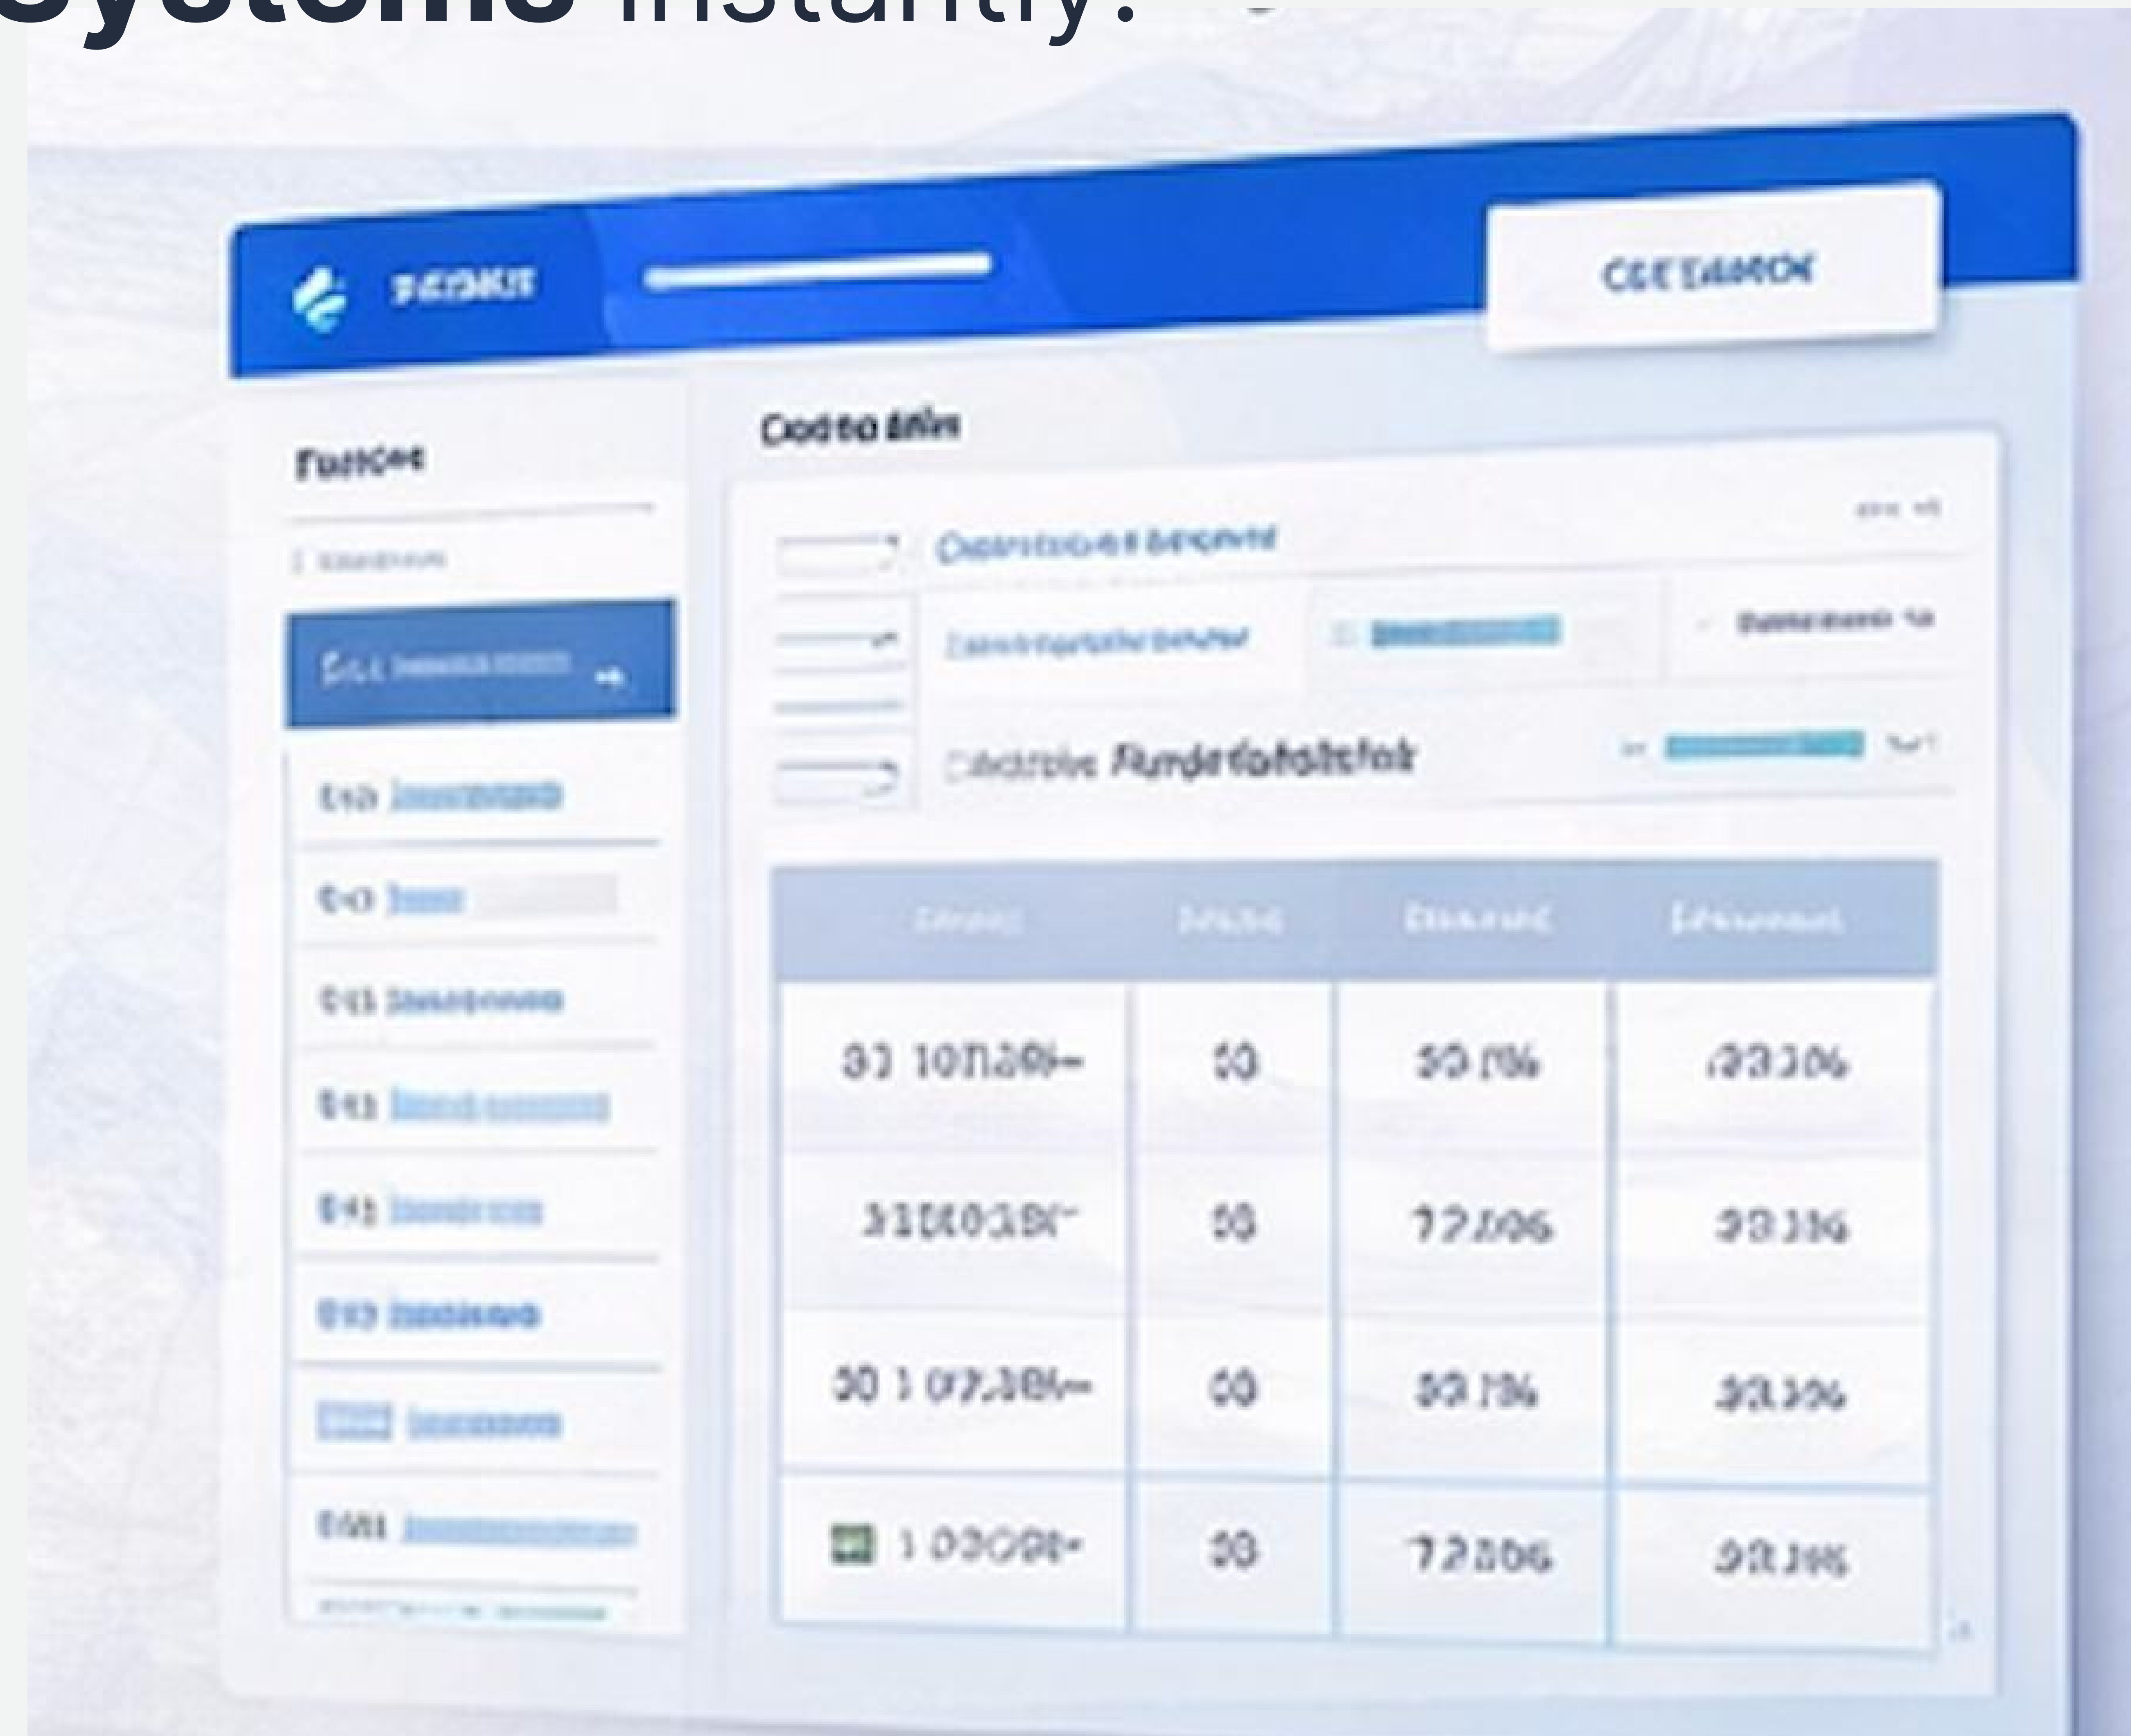

Auto generate

Dynamic Governed Applications

Operationalize

Your Forms

From Excels to **Enterprise Applications** in Minutes

PERSIVAPP

Governed

Auditable

Compliant

Controlled

Scalable

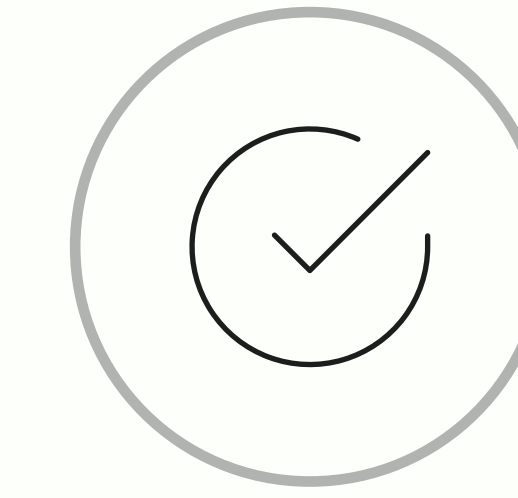

Version Controlled

Capture & Control

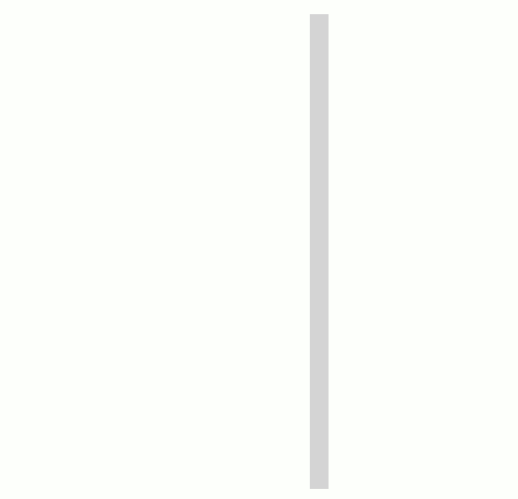

Trusted Data Every Time!

No more messy, unreliable data.
only decision-ready information.

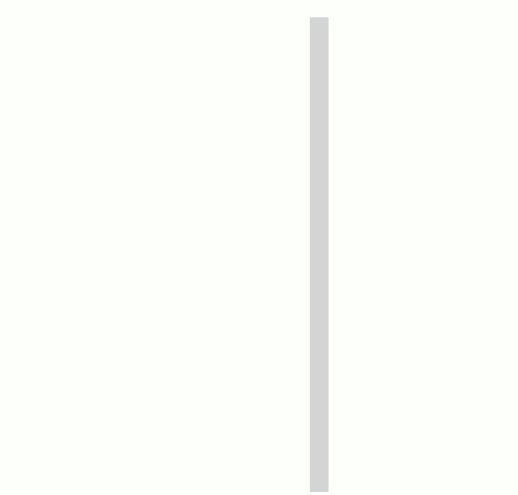

WHAT YOU GET OUT OF THE BOX

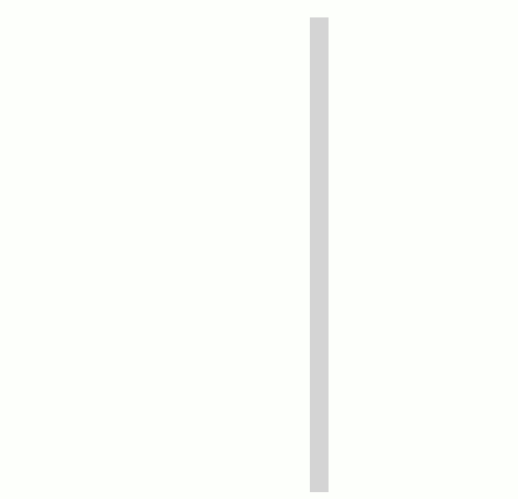

**Multi-observation entries
per record**

**Autosave entries + edit
locking to prevent conflicts**

**Structured validations and
controlled inputs**

**Digital Attestation for
accountability**

Make Your Data Powerful

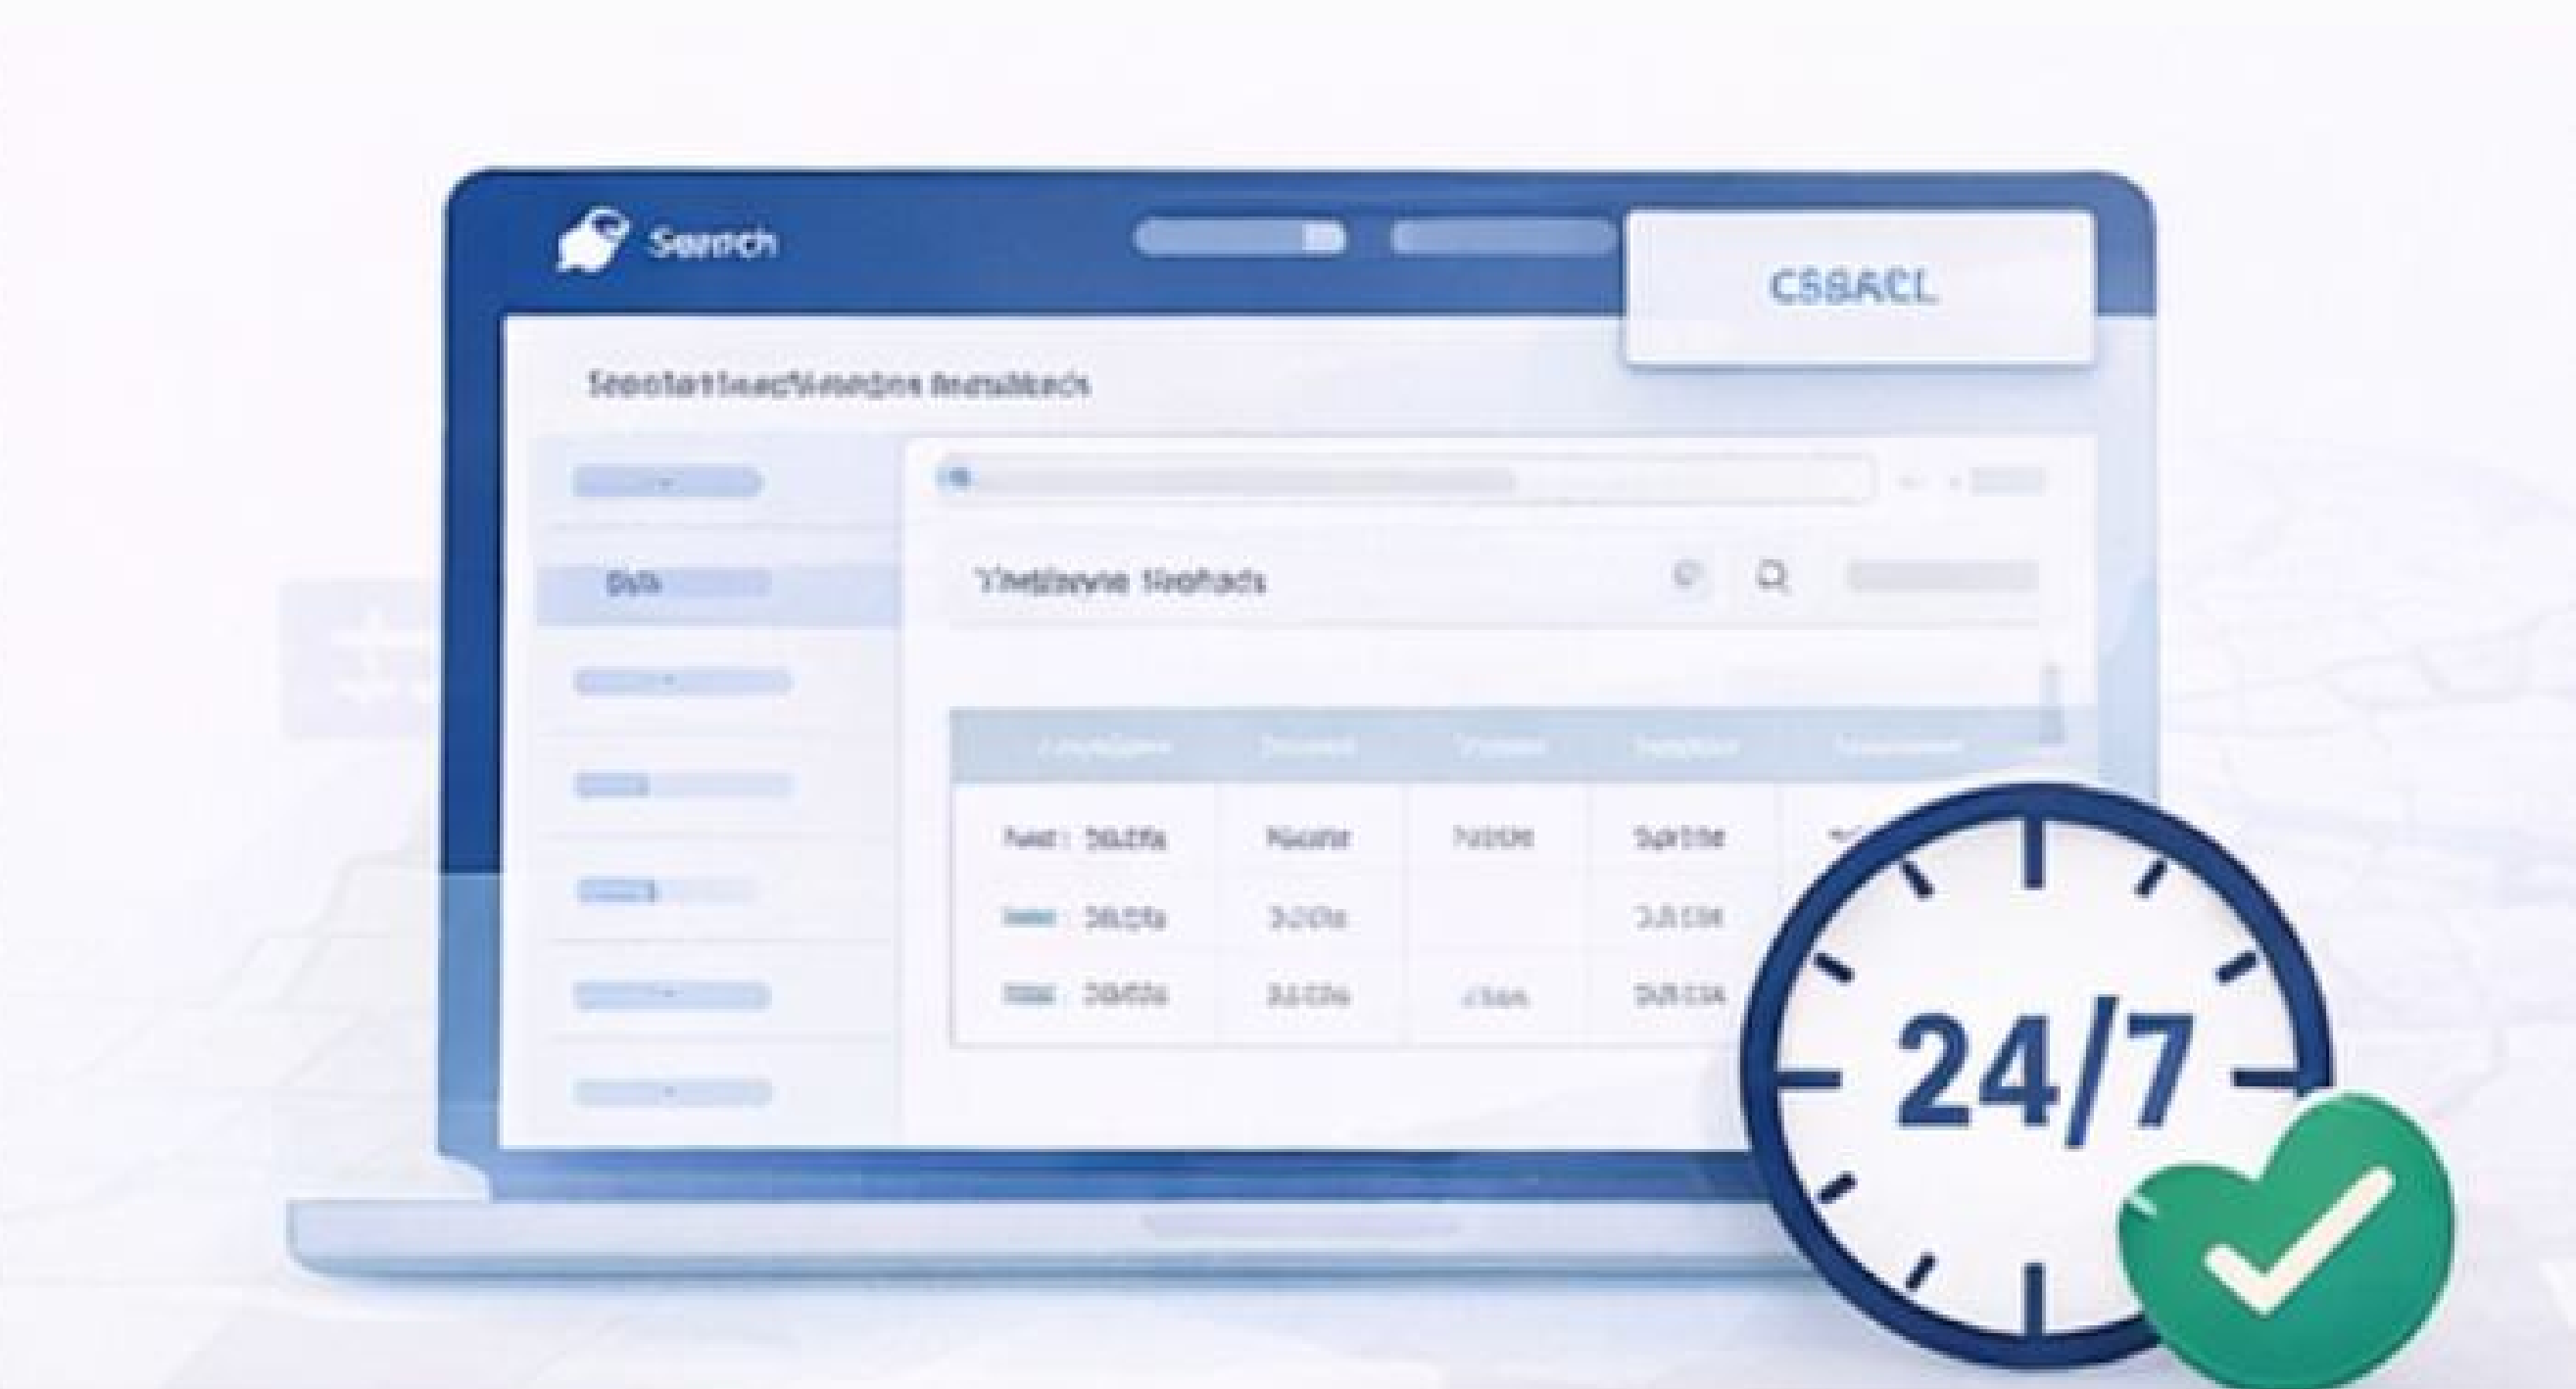

Your data finally upgrades to streamlined business operations!

Connect data across departments seamlessly

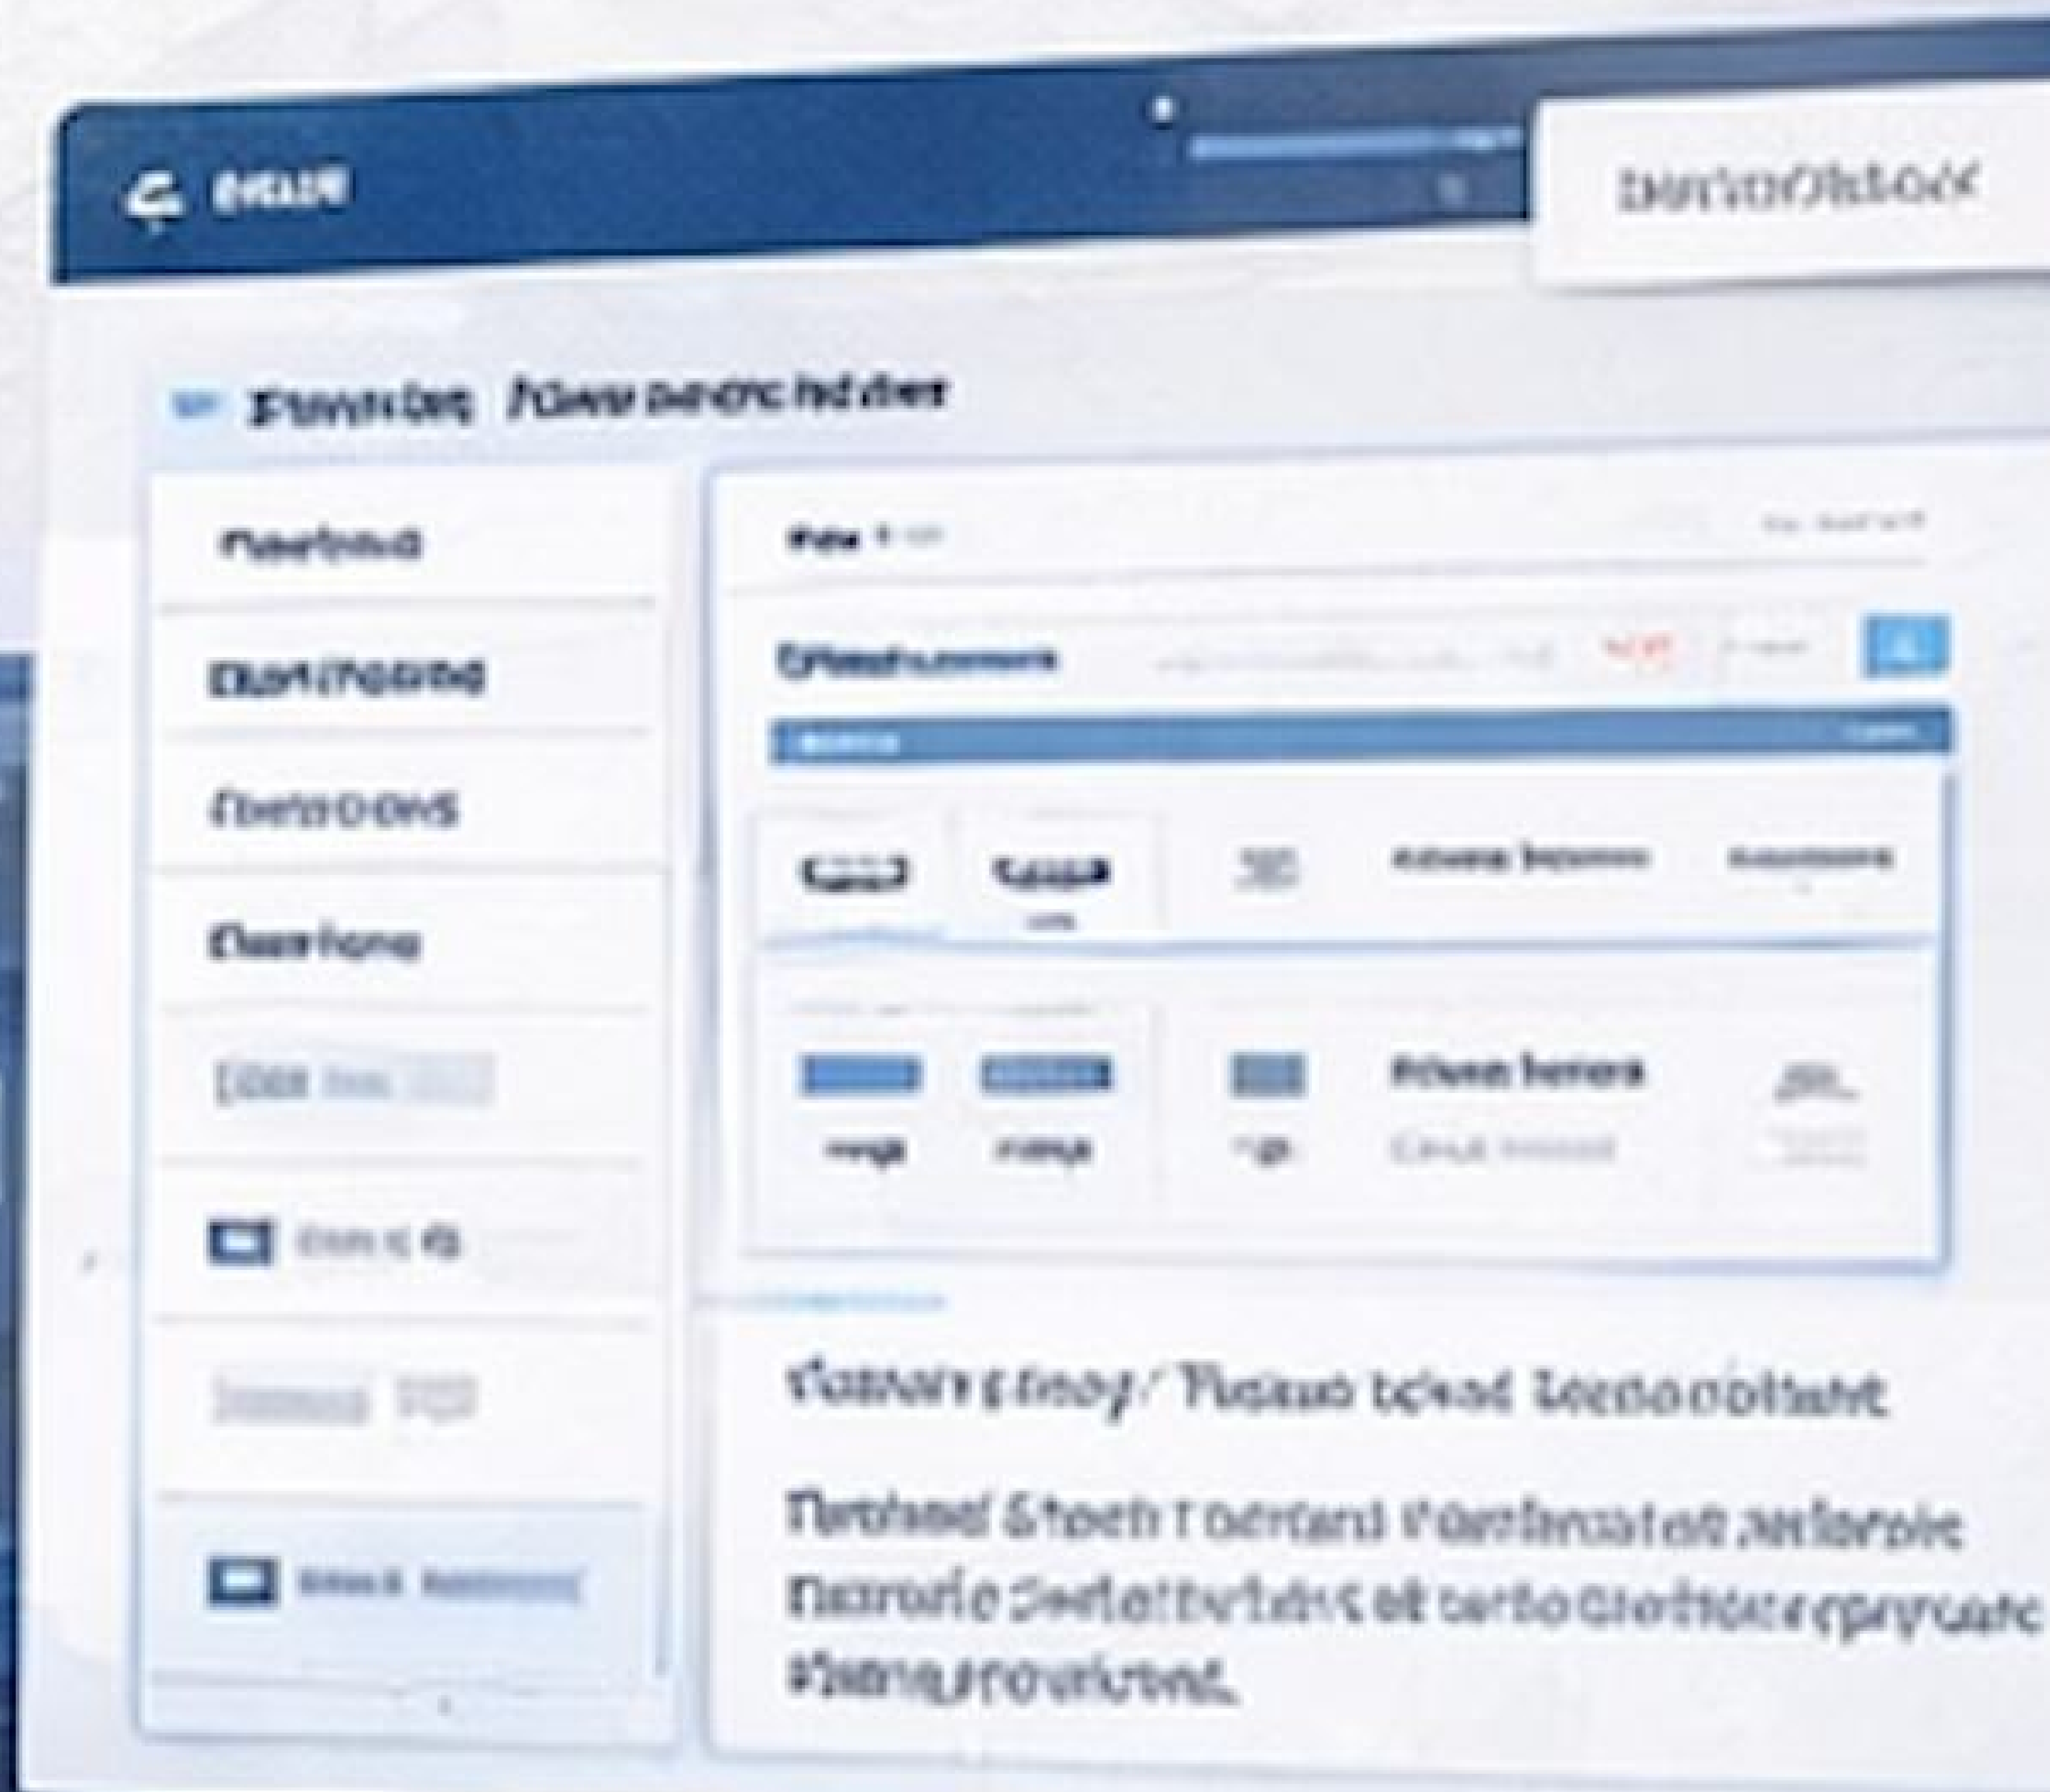

Save Hours on manual reconciliation and de-duplication of entries

Access real-time, structured business data anytime, anywhere, on any device

Built-In Governance for Your Business

✓ **Role-based access (Org → Form → Field)**

✓ **Full audit trail for every action**

✓ **Approval workflows with comments**

✓ **Version-controlled schemas**

Reliable, structured data

Faster execution across
all teams

**Audit-ready
records anytime.**
Add compliance
controls in any
app!

**Real-time
visibility** into
operations

**Scale to entire
organization** without
operational breakdown

From reactive management → **controlled execution**

From Manual Execution → Controlled Operations

No more follow-ups. No missing data. No uncontrolled processes.
Clear ownership. Complete visibility.

Adapt - Without Losing Control

- 1 Create and adapt processes (no IT bottlenecks)
- 2 Connect processes end-to-end
- 3 Enforce plant-level rules and validations
- 4 Add custom logic per plant

Enterprise Control Built-In

- 1 Defined roles (Admins, Owners, Approvers)
- 2 One standardized version across all plants
- 3 Tracked + version-controlled forms (who changed what, when)
- 4 No change goes live without approval

From Excel Chaos to Controlled Operations — in 45 Days

Used across **IPQC, QC & Logistics** with **full operational control**.

Before PersivApp

In 45
Days →

Before PersivApp

-  Scattered Excel Sheets
-  Manual Data Entry
-  Missed Quality Checks
-  Constant Follow-Ups & Delays

After 45 Days With PersivApp

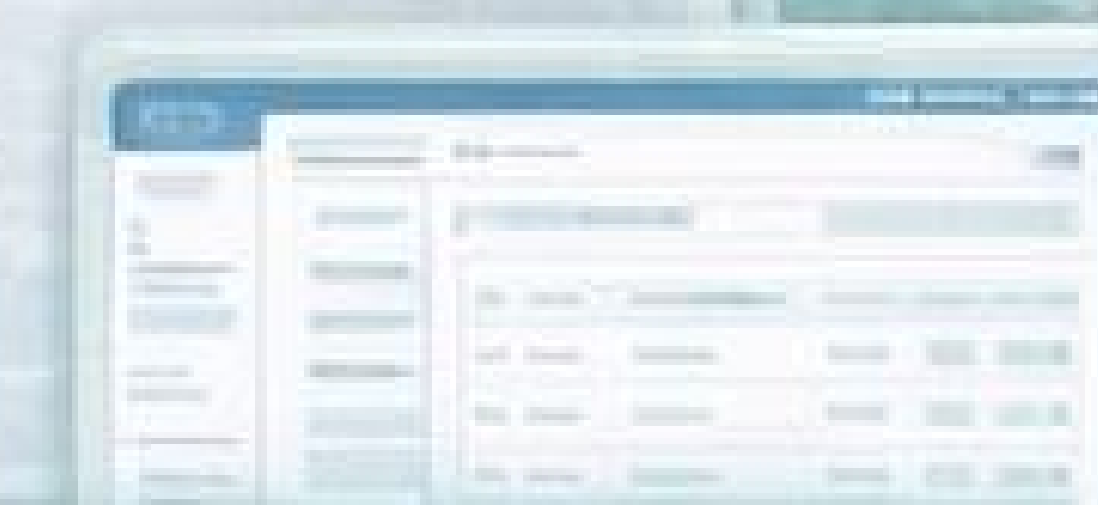

In-Process Quality Control

- ✓ Real-time checks across **all lines**
- ✓ Zero missed checks
- ✓ Standardized execution across teams

Pallet-Based Inventory Tracking

- ✓ Track every pallet movement end-to-end
- ✓ Real-time visibility across locations
- ✓ Eliminate manual reconciliation

Stock Reconciliation

- ✓ Faster audit cycles
- ✓ Accurate, traceable records
- ✓ Simplified year-end closing

Achieved full operational control across IPQC, QC & Logistics in under 45 days

Go **Live in Minutes**. Not Months. **ROI from Week One.**

Faster execution, zero bottlenecks

Why Businesses Choose PersivApps

Deploy in Minutes

Governed, Auditable, Compliant

Role-Based Access & Approvals

Version Controlled & Traceable

Connect Any System (ERP/MES/etc.)

Scale Without Operational Breakdown

Lower Cost, Higher Reliability

Deploy Applications for Every Business Function

Build any department-specific application your business needs — **instantly**.

Generate applications on the fly for every business operation — **without** code,

One Platform. Every Process. Fully Controlled.

End-to-End Business Operations Transformation

PERSIVAPP

Eliminate Manual Tasks

Automate tedious manual tasks to eliminate errors, speed up processes, and boost efficiency.

Real-Time Insights

Gain live actionable insights into **production**, quality, inventory, and costs

- ✓ Live Dashboards
- ✓ AI-Powered Analytics

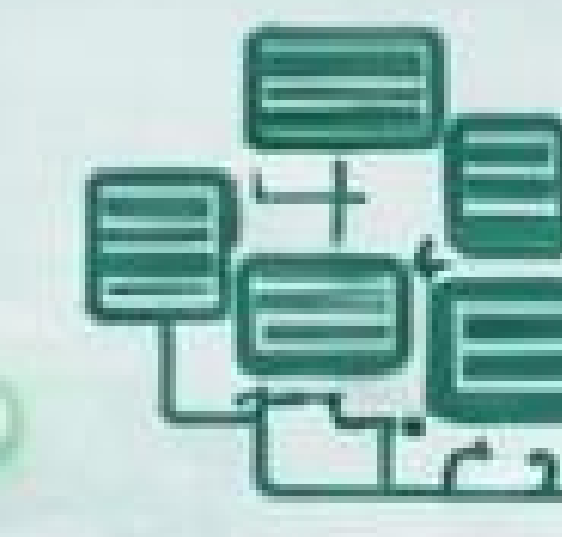

The Ultimate Outcome

Achieve real digital transformation, driving significant improvements across the entire company.

Standardize Best Practices

Enforce standardized, up-to-date processes from the factory floor to management.

Unify Your Operations

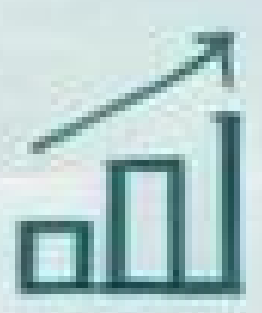

Connect all departments and data into a unified, intelligent platform that centralizes your operations.~

With PersivApps, You Get:

Governed

Role-based access and complete audit trails.

Scalable

Easily scale from one line to many.

N-Code

Build and deploy applications without coding.

No-Code

Build and deploy applications without coding.

Quick to Deploy

Fast deployment, faster return on investment.

Measurable Impact

Track performance, gain and drive results.
